Bulletin 3 – Grid Determinations Due to Adverse Weather

Due to the weather conditions qualifying was conducted under the safety car.

As per the final instructions, times set under the safety car in qualifying can't be used to set the grid, so the following grids were determined using the methods outlined below:

Miata Trophy

The grid was set by the current championship standings order, with anyone who has not scored points, having their grid position set behind those who have scored points, in the order of the date they entered the race. Any guest class cars will be placed at the back as normal.

MSVT Trackday Trophy

All drivers drew lots to decide their grid position.
