#### **Bulletin 4 – Focus Cup Start Procedure**

For Focus Cup Championship race one & two (timetable session 7 & 15), toward the rear of the grid a union jack will be dropped at the same time as the start lights are extinguished.

This is to act as a 'repeater' for the start lights. This is on the grounds of safety in order for the rear of the grid to be able to see the start signal.

This decision is made in consultation with the drivers. For the avoidance of doubt, both classes will still start on the same start signal supplemented by the additional 'repeater' union jack.
