

PIRELLI BSB Range 2025

Bennetts British Superbike Championship

Official Test – Navarra

Each BSB Superbike registered rider attending the Official Test at Navarra will have the option to utilise Qty 2 pcs of the 2025 specification SC0 from the Pirelli service.

These tyres will only be available from the service at Navarra.

The planned full introduction of the new specification remains as previously communicated – Oulton Park Official Test.

Diablo Rain / Diablo Wet

Due to loading capacity restrictions we are unable to guarantee supply of Diablo Rain & Diablo Wet from the service at Navarra. Please ensure to carry stock of these products.

Protyre Motorsport

Any team participating in this test that has not already contacted Protyre should do so asap.
Tel: 01782 411001

Note – Pirelli's recommended minimum 'in service' pressure (1.65 bar) must be observed.
To clarify, this is the minimum tyre pressure accepted to pass the grid test procedure and is not a suggested optimum on track pressure.

If further information is required please contact Jason
